Amit Deri

Full-Stack & Software Engineer

Central Israel | 054-4317017 | amit.derri@gmail.com | GitHub | LinkedIn | My site

SUMMARY

Full-stack and mobile developer with a B.Sc. in Computer Science and one year of professional experience building real-time cloud pipelines, REST APIs and iOS/Android apps. I use LLMs where they add real value while keeping business logic and calculations in deterministic, testable code. Background in IT support and a hands-on interest in application security.

EXPERIENCE

Full-Stack & Mobile Developer | osApps — Oct 2025 – Present

- Migrated the analytics pipeline from batch ETL to real-time streaming on GCP Pub/Sub, delivering session events (Protobuf/JSON) to BigQuery and Cloud Storage.
- Built REST APIs and backend services in Node.js/TypeScript and Python that consolidate customer feedback from the App Store, Google Play and SendGrid.
- Designed an analytics engine that uses LLMs (Claude, Grok) only for text extraction, translation and sentiment, with all statistics and decisions computed in backend code.
- Developed an internal QA app for iOS (SwiftUI) and Android, backed by Firebase, for real-time bug tracking between developers and QA.
- Automated build, test and deployment with Docker and GitHub Actions across AWS (EC2, S3) and GCP; shipped TypeScript web apps with MongoDB on EC2.

Computer Technician | Dr. PC — May 2019 – Mar 2020

- Hardware and software diagnostics, repairs and Windows patch management.

IT & Customer Support | Bank Leumi — Sep 2018 – Apr 2019

- Tier 1 support for internal banking systems; managed Active Directory permissions under least-privilege policy.

PROJECTS

- **IaC Risk Scanner** (Go, Rego) – flags unencrypted resources and over-broad permissions in Infrastructure-as-Code files.
- **Prototype Pollution Research** – demonstrated XSS and RCE through server-side prototype pollution in Express/EJS apps.
- **Video Analysis Pipeline** (Python, OpenCV, Tesseract) – real-time motion detection and OCR with fuzzy text matching.
- **CTF** – regular participant on picoCTF and TryHackMe (web security, binary exploitation).

SKILLS

Languages	TypeScript, Python, Go, Java, Swift, C/C++, SQL, Bash
Backend	Node.js, REST APIs, Firebase, Docker, GitHub Actions, CI/CD
Cloud	GCP (Pub/Sub, BigQuery, Cloud Storage), AWS (EC2, S3)
Mobile	SwiftUI, Xcode, Android Studio
Data	BigQuery, MongoDB, Firestore, Protobuf
AI	LLM integration (Claude, ChatGPT, Gemini, Grok), prompt engineering, Cursor
Security	OWASP Top 10, Kali Linux, Wireshark, IaC auditing

EDUCATION & LANGUAGES

B.Sc. Computer Science | The Open University of Israel — 2024

- Coursework: Algorithms & Data Structures, Operating Systems, Computer Architecture, Network Security.

Languages: Hebrew (native), English (fluent)
